# Benefits of LED

## EFFICIENT ENERGY USAGE

LED Bulbs use **15%** of the electricity of a standard halogen lamp.

LED bulbs generate the same light levels as halogen lamps.

8-10 longer

Life span

## COMPLEMENTARY SAVING

Since LED lights do not overheat, electricity bills from air conditioning and fan usage will greatly diminish.

The life span of LED product is **8-10** longer than standard bulbs.

## DURABLE BUILD QUALITY

LED's have no filaments therefore can withstand more shock than regular bulbs.

## RAPID BRIGHTENING

All LED lights turn on at **100%** of their intended brightness every single time.

## ENVIRONMENTALLY FRIENDLY

LED lights are designed to be **100%** recyclable.

LED lights have a life span equivalent to 25 incandescent light bulbs.

## FLEXIBLE, MULTI-PURPOSE DESIGN

LED can be produced in a variety of shapes and sizes.

## LONG WORKING LIFE

LED lights can last up to **50,000** hours - over 8 times the lifespan of a traditional bulbs.

## SAFE AND COOL

LED lighting temperatures are much **lower** than fluorescent or halogen lamps.  
LED lights safe to touch on installation.

## COMPLETELY WEATHERPROOF IN EXTREMES HOT OR COLD TEMPERATURES

LED lighting is able to resist extremes of temperature both excessively hot and freezing cold.

## DISPERSAL OF LIGHT

All LED lighting is primarily designed to focus light to a specific location or direction, without relying on an external reflector. This means it has a higher degree of efficiency than conventional solutions.
