

HPL: THE INNOVATOR OF TECHNOLOGY IN INDIA

LALIT SETH
MANAGING DIRECTOR

HPL, a Multi Product Electric Equipment Company is among India's foremost company known for its technology and quality. HPL has always focused on design & development of products, with the latest in technology that is available throughout the world. That is why, the heart of HPL activity is its R & D Centre, with over 100 full time engineers innovating new Technology/Process, in order to produce the very best in the country. HPL R & D Centre is approved by the Ministry of Science & Technology, Govt. of India. HPL product range is divided in four groups, Energy Meters, Switchgears, Lighting and Wire & Cable. The HPL range enjoys superiority in technology, quality and performance and has an edge over competitors in the fields of low-voltage Switchgear and protection devices, metering and Energy Management System, CFL luminaries, wires & cables. Recently HPL has added Modular Switches and accessories to its already large range of offerings to Homes, Offices, Retail and Hospitality. In Energy Meter, the company is the largest manufacturer of meters in India and among the top few in the world. HPL manufactures over 6 million Electronic Energy Meters per annum and is rated as the leader of metering technology in India. HPL has 9 manufacturing facilities covering over 9 Lac square feet spread mostly in NCR region of Delhi, Haryana & Himachal. In its lighting division HPL produces over 25 million CFL annually and has a vast range of LED Bulbs & Luminaries. In Switchgear plants HPL produces State of Art MCCBs, ACBs, Control Gears, and Change over Switches etc. HPL manufacturing facilities are ISO 9001, ISO 14001, OHSAS 18001 & ISO 27001. Its product has Quality marking of national & international standards like ISI, CE & KEMA

HPL has vast range of Electronic Energy Meters from Single Phase, Three Phase to Tri-Vector meters. We also produce a wide range of Energy Management Systems and Panel Meters. HPL produces over 6 million Electronic Energy Meters annually, making it the biggest manufacture of Energy Meters in India and among the largest in the World"

Mr Rishi Seth, JMD - HPL

HPL firmly believes in a simple yet effective philosophy of 3D – Duty to Work, Discipline to Quality and Devotion to Customer. This philosophy has helped build confidence around the company both with the customers and the HPL team. The Strength of this confidence is moving HPL from existing turnover of Rs.1300 Crores to Rs.1800 Crores in the next two years.

The company has 69 marketing offices spread across the country with 1500 authorized dealers and over 18000 retailers. The group has manpower team of over 5400 people and has its presence overseas in over 20 countries in South East Asia, The Middle East, Africa & Europe. Hence HPL is popularly known as the Technology Brand of India.
